

COVID-19 TESTING

Accessible. Fast. Easy.

CIC Health facilitates high-quality testing at the lowest possible cost — for safer work, school, and daily life.

Our goal is to transform the COVID-19 testing landscape to enable access to **routine testing** that surpasses the strictest regulatory standards and **delivers results quickly** — within 24 hours on average — **at a fraction of the cost.*** Currently we offer the gold-standard PCR test, and we're actively considering additional tests. Our testing collaborators and labs are some of the most recognized academic and scientific institutions in the country, including the Broad Institute of MIT and Harvard and the University of Minnesota Genomics Center.

How It Works

Organizations

- 1.** We create a tailor-made solution for you
- 2.** You order the tests you need for the following weeks
- 3.** We provide the training you need to establish your test collection site
- 4.** We help you set up a software portal for uploading and managing participant data
- 5.** Samples are collected for processing at a CLIA-certified lab
- 6.** Results are returned within 24 hours, on average

Individuals

- 1.** Set up a secure, personal account
- 2.** Confirm your personal information and complete the health questionnaire
- 3.** Select an appointment time that works for you and pay for your test
- 4.** Show up to the location of your choice at the scheduled time
- 5.** Complete your test in about three minutes
- 6.** Get your results within 24 hours, on average
